Subject: MBTA CRMF NPDES permit MA0003590: permit standard conditions for reference + 2015 MSGP link

Hi Clary,

Please see the updated standard conditions attached as Part II of NPDES permits below. 24-hour reporting is discussed on page 8 of 25.

<https://www3.epa.gov/region1/npdes/permits/generic/PartIIfinal2007.pdf>

Also, right after I spoke with you, I was browsing the 2015 MSGP and came across section 1.1.4.3 on page 4 (or .pdf page 10/376), which is relevant to the question you had about MSGP coverage. Since the MBTA CRMF is already covered by an individual NPDES permit, the facility would not be eligible under the 2015 MSGP.

https://www.epa.gov/sites/production/files/2015-10/documents/msgp2015_finalpermit.pdf

- 1.1.4.3 For Discharges Currently or Previously Covered by Another Permit.** Unless you have received written notification from EPA specifically allowing these discharges to be covered under this permit, you are not eligible for coverage under this permit for any of the following:
- Stormwater discharges associated with industrial activity that are currently covered under an individual NPDES permit or an alternative NPDES general permit;
 - Discharges covered within five years prior to the effective date of this permit by an individual permit or alternative general permit where that permit established site-specific numeric water quality-based limitations developed for the stormwater component of the discharge; or
 - Discharges from facilities where any NPDES permit has been or is in the process of being denied, terminated, or revoked by EPA (this does not apply to the routine reissuance of permits every five years).

If you have more questions about the MSGP, I can follow up with you or put you into contact with the folks who review the NOIs (notices of intent) for the permit.

Thanks,

Undine
